**RULES:** Any exhibit that is misrepresented as to ownership quality or appearance will be disqualified. All judges and superintendents will be treated in a courteous manner. Any drug administered on fair grounds must have superintendent approval and/or be given by a veterinarian. Every animal shall, at all times, be treated humanely and with dignity, respect and compassion. No person on show grounds including, but not limited to, barns, stalls, practice area and show arena, may treat an animal in an inhumane manner. Questions regarding conduct or rules of the show are to be made by the contestant and should be referred to the show division superintendent. If a problem still exists, it will be presented to the appeals committee. This committee will consist of the Fair Association Executive committee, department superintendent and the extension agent responsible for that particular area and may be called upon to furnish specific information or clarify rules involved in the protest. Any person wanting to appeal must obtain the Appeals form from the Extension Office or from the Fair Office in the livestock building, fully complete it along with a \$50 check made out to the Harvey County KS Fair Association, then deliver to one of the Executive Fair Board members. ## **DIVISION 2013 - 4-H/FFA STEM ROCKETRY / AIRCRAFT**

*Superintendents: Chip Westfall, Doug Stucky*

**CHECK-IN & JUDGING: 6-9 p.m., Thursday, Aug. 3**

### **RULES**

The Kansas 4-H Rocketry program is designed to allow 4-H members to explore aerospace through rockets of various sizes.

1. As defined by the National Association of Rocketry (NAR), a scale model is “any model rocket that is a true scale model of an existing or historical guided missile, rocket vehicle, or space vehicle.” The intent of scale modeling is according to the NAR, “to produce an accurate, flying replica of a real rocket vehicle, that exhibits maximum craftsmanship in construction, finish, and flight performance.” (NAR “Pink Book” 50.1 4-1).
2. NAR refers to the National Association of Rocketry and its governing board.
3. Adult supervision is defined as being under the direct supervision of someone 18 years of age or older.
4. High power certification is defined as having successfully completed a certification program for high powered rocketry through either NAR or TRIPOLI and maintaining that certification.

### **GENERAL GUIDELINES**

1. Each exhibitor may enter two rockets that have been constructed during the current year. If two rockets are entered, one must be a “kit.” To exhibit in this division, the rocket must have been flown. Support rods must not extend past the tip of the highest nosecone on the model. Support rods must remain in the upright position, do not angle. No model may be submitted on a launch pad.
2. The report that accompanies the rockets must be limited to the 4-H Rocket Exhibit Information form which is glued to a 10” x 13” envelope.
3. Plans (or a photocopy) must be placed inside the envelope. This includes original design rockets. If a rocket kit has been modified structurally, notations need to be given that indicate the changes made. One or more photographs of the rockets at the launch site are required. Photographs showing the rocket at the moment of ignition are preferred. Photographs should be mounted on one side of an 8 1/2” x 11” page.
4. For a rocket engine in the original design classes, one extra page of photographs may be added to show unusual construction or other important features. Describe in the summary how the model was tested for stability prior to flying.
5. The altitude achieved by the model is to be determined using a method other than estimation. Examples of accepted methods include altimeter, computer software, range finders, etc.

### **GENERAL CONSTRUCTION GUIDELINES**

1. Angles of fins must fall within a plus or minus 2-degree variation using an approved fin alignment guide (such as DGD 031989).
2. Exhibits must be uniformly painted, smoothly finished, and have decals applied smoothly. Fins should be rounded or streamlined. Fins and body tubes are to be sealed to eliminate the appearance of body grooves and wood grain. Any seams on plastic parts are to be sanded smooth. The rocket is to be properly assembled. Fins and launch lugs are to be filleted to reduce drag and properly secure them to the model. The nose cone is to fit snugly but still allow for easy removal.
3. Models may not be judged based on their paint scheme, with the exception of rockets that fit the definition of a scale model. Scale models may be judged based on the paint scheme. Under no circumstances is the weight given to the paint scheme to be sufficient enough, by itself, to move the model from one ribbon placing to another.
4. Flight damage is to be documented by the participant. The judging of flight damage is to be secondary to all other aspects of the model and only then may it even be considered.

5. Cloverbud only - Beginner kits with prefabricated fin assemblies and pre-finished rockets requiring no painting are acceptable in Cloverbud class only.
6. Engines and igniters are not permitted with the exhibit.
7. Original design rockets cannot be a modification of a pre-existing kit and must be of original design.
8. Multi-stage rockets can be flown using just the final stage.

#### **ROCKET GUIDELINES**

1. 4-H members must be currently enrolled in 4-H Aerospace/Rocketry program to exhibit in this division.
2. Each rocket must be able to stand freely by itself or may be displayed on a solid base, not exceeding 3/4" thick & 8" square.

#### **Exhibitors 7 -13 years old**

#### **10 years and older**

This class is designed to encourage teamwork among individuals and clubs to work on a rocket from initial design to the finished product.

Class 06 - Rocket designed by 2 or more exhibitors; not merely a modification of an existing kit. Include original plans.

## DIVISION 2019 - 4-H FIBER ARTS & VISUAL ARTS & CRAFTS

*Superintendent: Deidra Hendricks*

**Judging: 8:30 - 10 am, Friday, Aug. 4**

### Fiber Arts

1. Fiber Arts is defined as any method of creating a unique design with fiber, fabric or yarn. This may include: making fabric (such as weaving, crochet, knitting, needlepoint); or when existing fabric is changed into something quite different (such as quilting or embroidery or ethnic art.) Ethnic Fiber Arts should use a fiber, yarn or fabric to create the design exhibit. **Non-textile (examples include wood, reed, straw, grass, etc.) baskets/pieces should be entered in the Visual Arts Division.**
2. Identification Label:
  - a) Type or print on a 3" x 2 1/2" piece of cloth: class number, county or district, and exhibitor's name.
  - b) Sew or safety pin this ID label on the corner of flat articles;
  - c) For garments, attach ID label to the front left shoulder seam, or left side of waistband, as if you were wearing the garments.
3. A member may enter 5 exhibits in the Fiber Arts classes. All articles/garments must be finished for use.
4. When articles, which are normally worn as a pair, are exhibited, both articles must be shown together. Fasten articles together securely with yarn.
5. Special consideration will be given to articles, which are of original design. Such articles should have a note attached explaining the original design.
6. The exhibitor should attach an index card, no larger than 4" x 6", with the entry form to give the judge any information on what parts of the exhibit they made, processes used, or other information which the exhibitor thinks would be helpful for the judge. For all items please indicate if item was made from a kit. For all items please indicate fiber content, and specifically if they are made of at least 90% wool. For quilted items indicate who did the quilting and binding.
7. Exhibitors are expected to be enrolled in the Fiber Art project in which they are entered. When the exhibit is a sewn garment that also includes one or more Fiber Art techniques (i.e. knitting, crochet, needle arts, or patchwork and quilting), the determination of what division (Clothing or Fiber Arts) and class in which to enter will be left with the 4-H participant.
8. Fiber Arts Educational Notebook - Share with others what you learned in this project about a particular Fiber Art. Exhibits should be in the form of a notebook or binder. The notebook should include a narrative section describing the fiber art. It should include a clear description of the project, technique, budget, supplies, goals, accomplishments, successes, failures, and future plans. It may include samples of techniques, how-to photographs of completed projects, or other ways of educating others about fiber arts. NOTE: A collection of brochures, web pages, patterns, record book forms, etc. does not constitute an educational notebook. Follow copyright laws as explained in the General Rules as you are preparing your exhibit. Name, local unit and fiber art covered must be clearly marked in the notebook.

### Classes:

- Crochet, an article including felted items. (See #7 above)
- Knitting, an article made either by hand or by knitting machine including felted items. (See #7 above)

a practical skill that was developed to provide basic family needs such as apparel, home furnishings or decorations. It is also defined as a method that has been maintained throughout history and passed on to others, often by observation and by example, such as batik, Swedish huck towel weaving, mud cloth, bobbin weaving, tatting, felted items that are not knitted or crocheted, etc. Members should attach information on the history of the ethnic fiber art, where it was used, by whom, how it was used, short description of the technique, etc. (See #7 above)

- Macramé, an article
- Fiber Arts Educational Notebook

## Visual Arts

1. Articles exhibited must be an original design created by the exhibitor. See copyright guidelines below

3. **A member may enter 5 exhibits in the Visual Arts classes.**
4. Exhibits must be of manageable size and be easily transported and displayed by one person.
5. All exhibits which need to be hung (including **all** fine arts) **must** have a wire or saw tooth hanger attached (no string or tape). If necessary hardware is not attached, it will be deducted a ribbon and will not be displayed.
6. Multi-piece items should be marked accordingly.
7. 4-H members should exhibit in the project in which they are enrolled. The Fiber Arts Project offers classes for quilting, embroidery, counted-cross stitch, etc.
8. No plants or plant materials needing watering can be entered as an art display or item.
9. Art Release Form covers items while on display at Rock Springs and must accompany art exhibit to be considered for Rock Springs display.
10. All exhibits are entered at your own risk. Art Release Form covers items while on display at Rock Springs.

## Classes:

### Fine Arts

Oil, chalk, charcoal, dyes, pastels, pencil, ink, acrylic, or watercolor on canvas, canvas board, paper, wood, metal, or textiles, framed as a picture, prepared for hanging. Stretched canvas art on a wooden frame is considered prepared for hanging provided that frame has a hanger.

### Clay and Ceramics

Any original item made of clay; may be fired or unfired, hand formed, or thrown on a wheel. Self-hardening, fire/oven-cured, and/or cornstarch clays are acceptable. Items can include, but are not limited to, clay statues, bowls, etc.

### Leather and Jewelry

Any leather stamping, carving, tooling, lacing, or stitching piece or any jewelry piece made from any medium are acceptable exhibits.

### Three-Dimensional

The piece must be observable on at least three sides and should be either free-standing or prepared to be hung. (Legos would fall under this class but there is a specific class for Legos. Please see **Architectural Block**)

### General Crafts

This category incorporates miscellaneous pieces that do not correspond to the four, above-mentioned categories.

### Copyright

\*Kits and preformed molds are not considered original and are not acceptable in any Visual Arts Class. Combining parts of different patterns (pictures, photographs, images from the internet or a magazine) with the member's own ideas can result in an original design, but simply changing the color, pattern, and/or size of a pattern does not make the design original. If you create a replica of what you see somewhere else (i.e. Pinterest), it is not your original design. If a photo, sketch, or other idea source was used, submit it with your entry, firmly attached to your exhibit.

### **Rock Springs**

Some artwork will be selected to be on display at Rock Springs 4-H Center during 2023-2024. 4-H members should include an Art Release Form, available from their Extension Office, with their exhibit indicating their willingness to have their art displayed at Rock Springs for a year. The release form will be removed at check-in and filed by county/district to expedite the selection process. Previous Rock Springs display items will be returned to Extension Units upon the conclusion of the State Fair.

## **DIVISION 2020 - 4-H/FFA STEM ROBOTICS**

### *Superintendent:*

1. 4-H members must be currently enrolled in the Kansas 4-H Robotics project to exhibit in this division.
2. Each exhibitor may enter one robot per class. Exhibit must have been constructed and/or completed during the current 4-H year.
3. Each robot must be free-standing, without the need for additional supports in order to be moved or exhibited. Each exhibit must include a robot, information packets are not a sufficient exhibit.
4. Robots must have automated articulated structures (arms, wheels, grippers, etc.). Game consoles that display on a screen are not considered robots and should either be entered in computer system division or energy management project. Robots requiring no assembly, just programming, such as Ozobots, are considered computer system projects as the skill is focused on the programming not on the construction of the robot.
5. Robot dimensions should not exceed 2 feet high, by 2 feet wide, by 2 feet deep. Weight may not exceed 15 pounds. If displayed in a case (not required or encouraged) the outside case dimensions may not be more than 26 inches in height, width, or depth.
6. Materials including but not limited to obstacles, spare batteries, and mats for testing the robot may be placed in a separate container, which is not included in the robot's dimensions, that container may not be larger than 576 cubic inches as measured along the outside of the container. (Examples: 4"X4"X36" or 4"X8"X18" or 6"X6"X16) The container, if used, and/or any large objects (such as mats or obstacles) should be labeled with the exhibitor's name(s) and county or district.
7. All electric components of the robot must be adequately covered or concealed with a protective enclosure. Paper is NOT considered an adequate enclosure or covering for electrical components.
8. Robots may be powered by an electrical, battery, water, air or solar source only. Junk drawer robots may be powered by a non-traditional power source. Robots powered by fossil fuels/flamable liquids will be disqualified. Robots that include weaponry of any kind will be disqualified. Weaponry is defined as any instrument, possession or creation, physical and/or electrical that could be used to inflict damage and/or harm to individuals, animal life, and/or property.
9. Remote controlled robots are allowed under certain conditions provided that the robot is not drivable. Robotic arms (hydraulic or electric) are allowed. A remote is allowed provided more than a single action happens when a single button is pressed on the remote, for example "a motor spins for 3 seconds, at which point an actuator is triggered, then the motor spins for 3 more seconds." Remote controlled cars, boats, planes and/or action figures, etc. are not allowed.
10. Each robot must be in working condition. The judges will operate each robot to evaluate its workmanship and its ability to complete its intended task. In the event the robot uses a phone, tablet, or similar device for programming AND control of the robot a video will be used to evaluate the working condition of the robot.
11. Each exhibitor is required to complete the "4-H Robotics Exhibit Information Form" which is available through your local K-State Research and Extension office or at [www.STEM4KS.com](http://www.STEM4KS.com). This form must be attached to the

outside of a 10" x 13" manila envelope.

12. The exhibit must include written instructions for operation (the instructions should be written as if they were to tell a grandparent or elderly person how to operate the robot), construction plans, and one to three pages of project photographs. In addition, a 5-minute video presentation placed on a CD, DVD, USB drive, or similar removable storage device, if applicable. For robots that can be programmed, robot programming information must be included, this information should be placed inside the 10" x 13" manila envelope mentioned above. The exhibitor may enter their electronic project listed under the management program if the exhibitor so chooses. No exhibitor will be allowed to set up their robot in person.
13. In the event that the robot uses a device like a phone, iPad, or tablet for programming AND operation, DO NOT include the device (phone, tablet, etc.). The device's safety cannot be insured. Instead record a video demonstrating the instructions included for your robot. It should show, setting up the robot, starting the robot, the robot executing its task, and powering off the robot, just like the instructions are written.
14. Each exhibit MUST include a video of the youth following their instructions for operation. This allows judges to get a better understanding of the exhibit and allows the youth the opportunity to fully demonstrate their exhibit. The video should be no longer than 8 minutes and should be placed on the CD, DVD, USB drive, or similar. These videos may also be considered for inclusion in a running video loop in the STEM area at the state fair after review by judges, superintendent(s), and extension staff. Adult guardians must complete the video release included with the exhibit form. If the release is not completed the video will not be included in the video loop on display in the STEM area at the Kansas State Fair.
15. Creativity, workmanship, and functionality will be strong criteria in judging the "Robot designed by Exhibitor" classes. All robots should have a purpose or intended function, examples include, but are not limited to: following a line, sweeping the floor, solving a Rubik's cube, sorting colors, or climbing stairs.
16. Exhibitor's name(s) and county or district must be tagged or labeled in a prominent location on the robot,

## DIVISION 2021 - 4-H/FFA STEM ARCHITECTURAL BLOCK CONSTRUCTION

### *Superintendent:*

The STEM ABC exhibit area focuses on using architectural blocks (“Legos”) to construct dioramas. This project allows youth to explore architectural design in a three-dimensional space. The intent for this program is to allow youth to explore the construct and gain Knowledge through interaction with a common toy. This division is not intended for youth wishing to exhibit constructed kits. Kits and non-diorama displays should not be displayed in this division. Rules

1. 4-H members should be currently enrolled in the Kansas 4-H STEM – Architectural Block Construction project to exhibit in this division.
2. Each exhibitor may enter one exhibit. Exhibits must have been constructed during the current 4-H year.
3. Total exhibit dimensions may not exceed 2 feet high, by 2 feet wide, by 2 feet deep.
4. The minimum exhibit dimensions must be at least 6 inches wide and deep.
5. All exhibits should be placed in a sturdy see through enclosure with a top, bottom, and 4 sides. A clear tub turned upside down with the exhibit placed on the lid would be an acceptable enclosure. It may be desirable to place a cutting board or other hard surface between the lid and base plate of the exhibit to make it sturdy. This is to keep exhibit components from being “scattered to parts unknown” at the fair. The outer dimensions of the enclosure do not count towards the total exhibit dimensions but should not be excessive.
- 6. Bring it for exhibit at the county fair is up to the 4-Her and their family. The Extension Office nor the Fair Association is responsible for missing pieces or broken exhibits.**
7. All components used in construction should be dust free, clean, free of chips, scuffs, or cracks
8. Gaps or cracks should not be visible between assembled blocks unless they fit with the story, for example an earthquake
9. The primary building component should be interlocking blocks, commonly referred to by the brand name of Lego®
10. Other components can be integrated into dioramas to illustrate architectural aspects that may be difficult to convey with traditional interlocking blocks, for example marbles for small round objects
- 11. The use of existing “store bought” sets for major elements of the display is not allowed, use of figurines from sets is allowed as are using individual bricks to create something different than the set it came from. The intent of this is to ensure fairness among exhibitors and encourage maximum creativity instead of just following a set of plans.**
12. Dioramas should be suitably complex and have multiple elements, for example, a camp site that has a log cabin, a tree fort, and a car.
13. All dioramas should have a story, which is part of the information pack, that describes what is happening in the diorama; this can be as simple (the nursery rhyme “Jack and Jill” for example) or compels as needed to

explain to someone looking at the exhibit what is happening.

14. Vehicles that are intended to stay in a single place should be affixed to base plates with sticky tack, hot glue, or other method

15. Mechanical enhancements or motion elements that add motion to the diorama are acceptable and encouraged. For example, marry-go-rounds, doors, elevators, gears, marbles going down a channel, flapping wings, animatronics, etc. If included judges should be able to use them and instructions should be provided for operation either in the story or on a separate page.

**16. Artistic designs, for example recreating paintings like the “Mona Lisa” or “Starry Nights” and structures like “David” are not permitted as exhibits and one ribbon placing should be deducted, These exhibits should be displayed in Visual Arts.**

17. Each exhibit must include an Architectural Block Construction information packet. Entry of just a packet without an accompanying exhibit is not a sufficient exhibit.

18. Each exhibitor is required to complete the “4-H STEM Architectural Block Construction Exhibit Information Form” which is available through your local K-State Research and Extension office or at [www.STEM4KS.com](http://www.STEM4KS.com). This form must be attached to the outside of a 10” x 13” manila envelope. Do not tie the envelope to the exhibit. All revisions of forms previously released for the STEM division dated prior to current year are void for use and new forms must be obtained and used that are dated by the Kansas State 4-H Office for the current year.

19. Each exhibit information packet should include the following items: a. 1 to 5 pages of photos showing work on the exhibit, preferably from a beginning state to final or completed state, these help in determining where a part might go in case something comes loose. b. If appropriate operating instructions for mechanical portions of the diorama.
